CSA4312 – Internet Programming

Experiment - 5

Name: K. Dedeepya

Reg No: 192324252

Aim

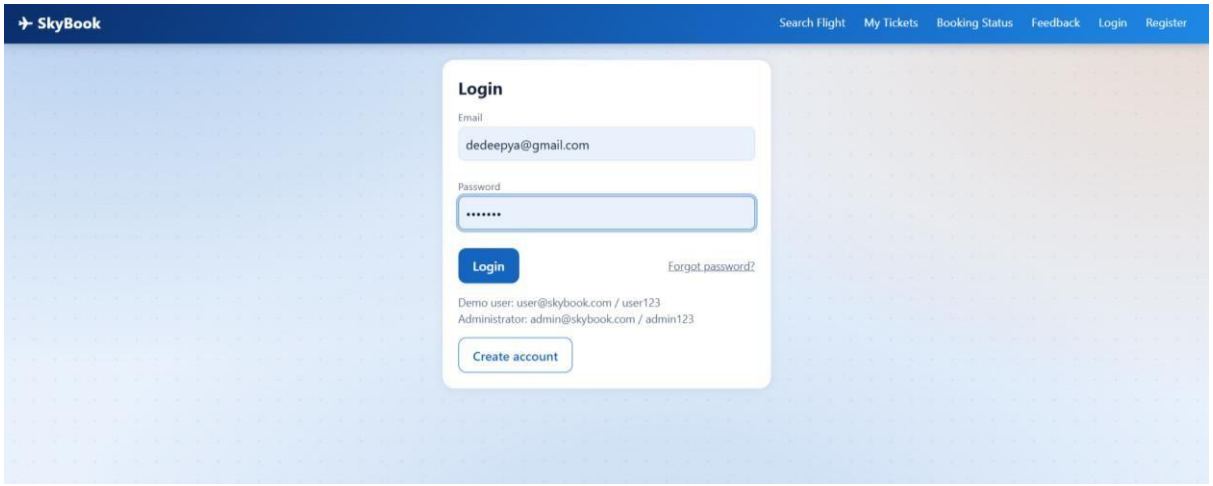

To develop an online Flight Reservation System for searching flights, booking tickets, making payments, checking booking status, and cancelling tickets.

Procedure

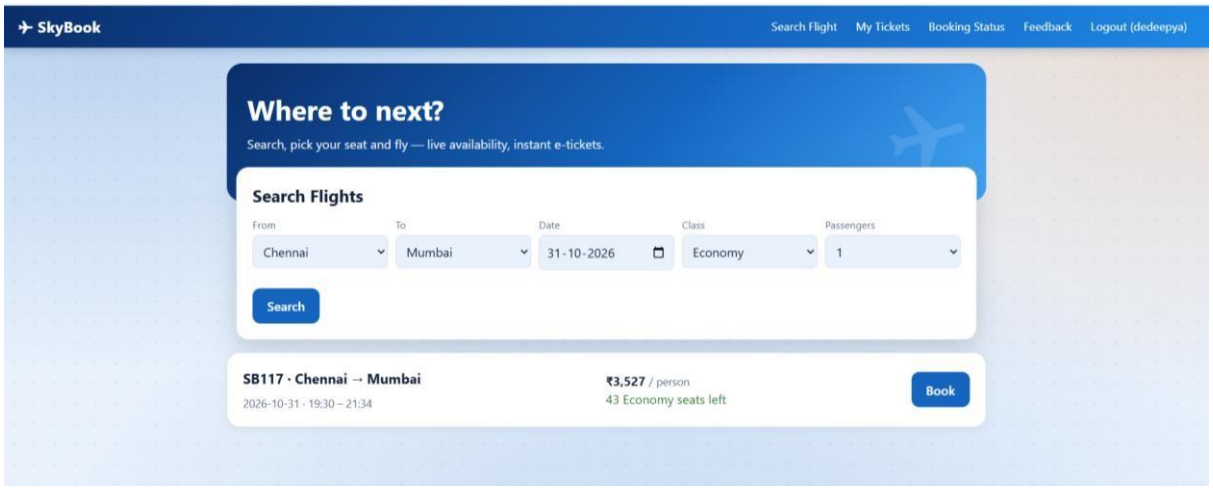

1. Create a secure login page for administrators to manage the flight reservation system.
2. Provide an option to reset the password when users forget their login credentials.
3. Allow users to search for flights by entering the departure city, destination, travel date, and travel class.
4. Display available flights with timings, fares, and seat availability. Allow users to select a flight and enter passenger details.
5. Enable users to pay the ticket fare through secure online payment methods and confirm their bookings.
6. Provide a page where users can view their booked tickets, passenger details, and travel itinerary.
7. Allow users to check their booking status using the booking reference number.
8. Allow users to cancel their flight tickets and view the applicable refund amount according to the cancellation policy.
9. Generate an e-ticket with flight details, passenger information, journey date, and booking reference number for printing.
10. Allow customers to submit feedback and enable administrators to manage flight schedules, bookings, payments, cancellations, and customer records.
