CSA4312 – Internet Programming

Experiment - 6

Name: K. Dedeepya

Reg No: 192324252

Aim

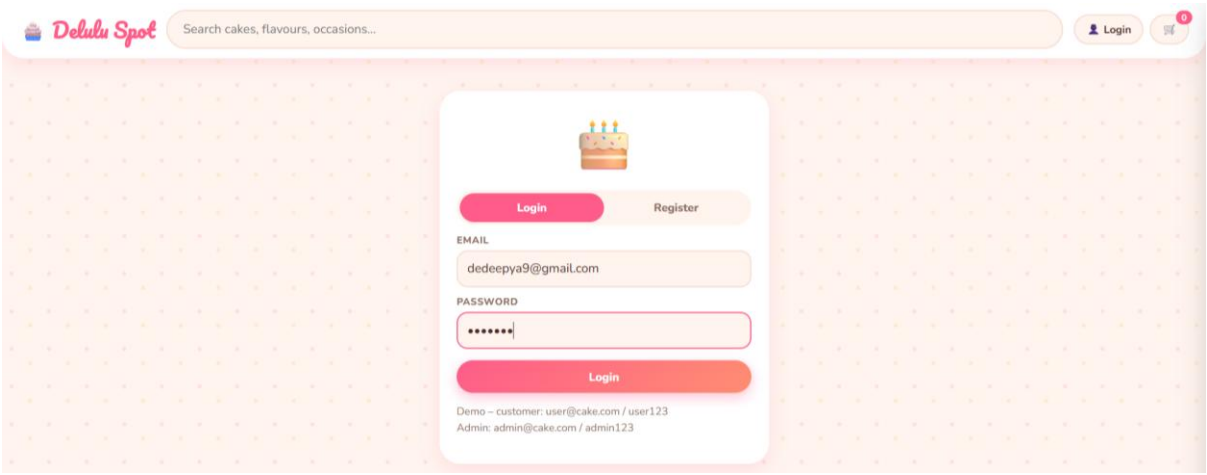

To develop an online Cake Ordering System that allows users to search, customize, order, and track cake deliveries, while enabling administrators to manage cakes, orders, and delivery details.

Procedure

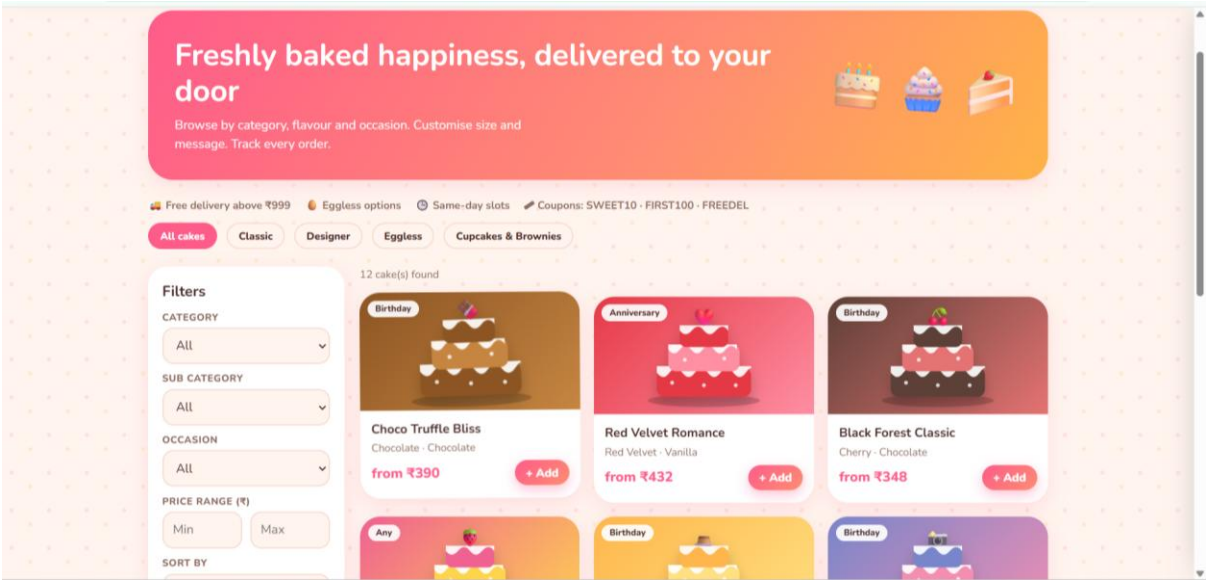

1. Create a secure login page for administrators to manage the cake ordering website.
2. Allow administrators to add cake details, upload images, update prices, and manage cake availability.
3. Provide registration and login pages for users to create accounts and access the website.
4. Enable users to search for cakes and filter them by category, flavour, occasion, and price range.
5. Display cake images, descriptions, prices, available sizes, and customization options.
6. Allow users to select cakes, customize their orders, and add products to the shopping cart.
7. Enable users to enter delivery details, confirm their orders, and complete payments through available payment methods.
8. Allow users to add or update their delivery address before placing an order.
9. Provide a page where users can view their order history and track the delivery status of their cakes.
10. Allow administrators to manage customer orders, update order status, and manage shipping details. Provide a logout option for both administrators and users.
