CSA4312 – Internet Programming

Experiment - 7

Name: K. Dedeepya

Reg No: 192324252

Aim

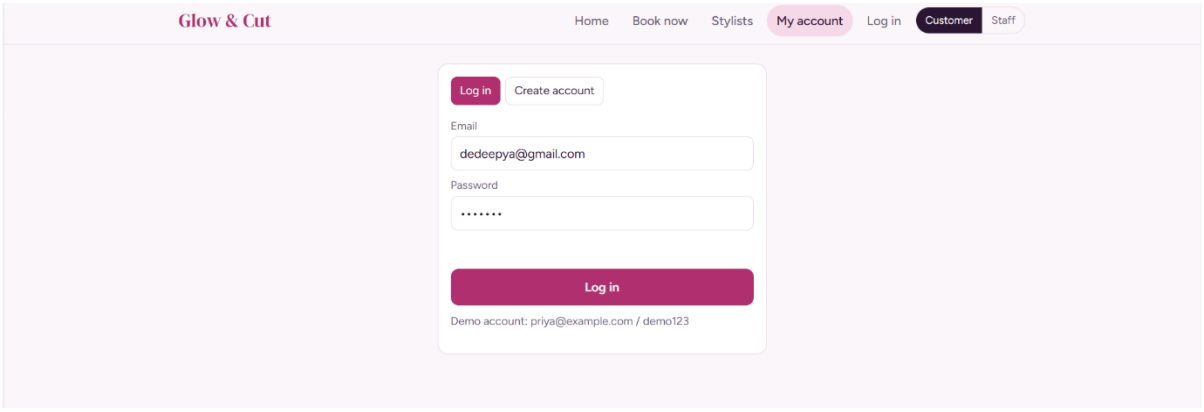

To develop an online Beauty Parlour Appointment Booking System that allows customers to explore beauty services, book appointments, make payments, and manage reservations, while enabling salon staff to manage schedules and customer bookings.

Procedure

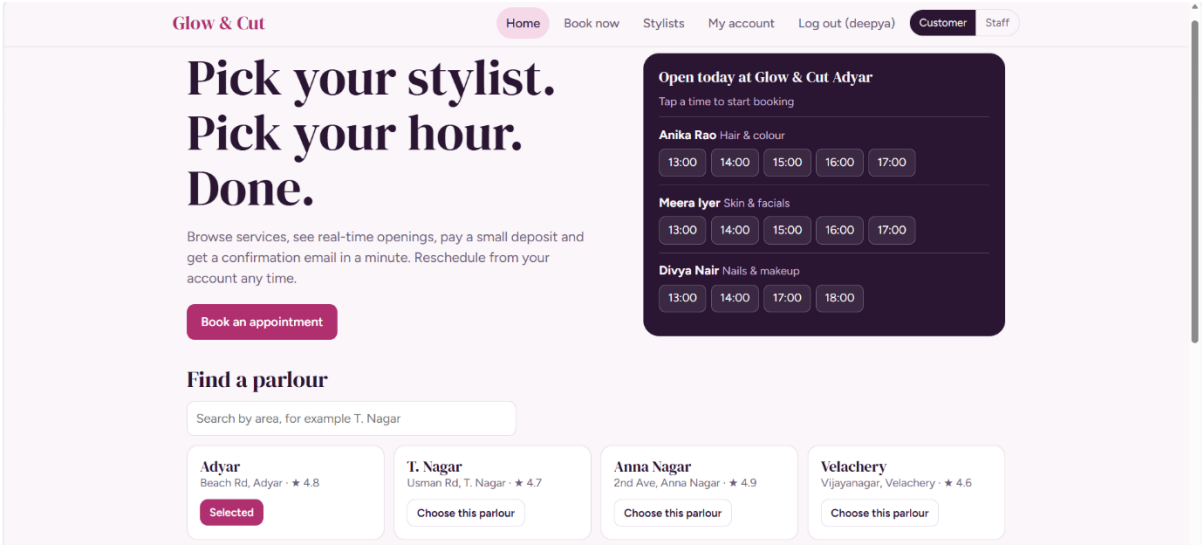

1. Create registration and login pages that allow customers to create accounts and access their personal dashboards.
2. Display available beauty services, prices, stylist profiles, and service descriptions to help customers choose suitable treatments.
3. Allow customers to select a service, choose a stylist, and book an appointment by selecting their preferred date and time.
4. Provide options to create, edit, reschedule, and cancel appointments through the customer dashboard.
5. Display appointments in a calendar and prevent bookings during unavailable hours or already reserved time slots.
6. Enable customers to pay the full amount or a partial deposit through supported online payment methods.
7. Send appointment confirmations and reminders to customers through email or SMS, including important booking details.
8. Allow customers to view upcoming appointments, reservation history, and personal information in one place.
9. Enable salon administrators and staff to manage services, stylist schedules, reservations, and customer details.
10. Allow customers to submit feedback about their experiences and test the system to ensure that booking, payment, cancellation, and scheduling features work correctly.
